Dr. Jeffrey B Brown, MD

Assistant Professor in Pediatrics - Gastroenterology, Hepatology and Nutrition

My laboratory focuses on understanding pathways relevant to the recruitment and trafficking of leukocytes within the intestines. Our goal is to understand how altering this recruitment can influence states of intestinal inflammation, specifically Inflammatory Bowel Disease (IBD). His primary clinical interest is IBD (Crohn's disease and ulcerative colitis). He is also interested in understanding the relationship of the intestinal immune system to GI symptoms in rheumatologic disorders, specifically Juvenile Dermatomyositis.

➤ **12:00 p.m. | Lunch**

**Earn up
to 12 CE
Credits!**

➤ **1:20 p.m. | THE SILENT AIRWAY PROBLEM: Its Impact on Development, Performance and Health -Connecting the Dots for Diagnosis and Treatment**
